

## MAINTENANCE-FREE DURABILITY

- 1. Rigid FrameSaver® Core:** Stands strong against bending and bowing, regardless of temperature or installation conditions.
- 2. Maintenance-Free:** Maintenance-free composite bottom that won't wick or rot, wrapped in a composite skin for lasting, worry-free performance.

### Supports Hinged Patio & Sidelite Applications:

With a rigid engineered core, FusionFrame® mulls stand strong and eliminate concerns with thermal bow.

**Finishing Freedom:** Available in a paintable prefinished white or textured stainable finish (shown above).

## ROCK-STEADY RIGIDITY

5-5/8" Storm Door Ready Mull

### Supports Storm Door Installations:

Tested and proven to provide sturdy support for storm door installations, even with sidelite and patio units.

**Product Versatility:** With 2 rippable jamb options, you are not limited to standard frame sizes. FusionFrame supports uncommon and varying wall depths, all while maintaining a flawless finish.

## UNLIKE ANY OTHER COMPOSITE DOOR FRAME

FusionFrame® is a unique solution that fuses together the benefits of all-wood and all-composite jambs, while delivering:

**Uncompromised Stability:** Sturdy performance against bending and bowing, unlike other composite frame products.

**Compatibility With Any Door Configuration:** Build what you want and meet your application needs without compromise.

**Ease of Installation:** Installs like a familiar wood jamb system and remains straight without shimming every 12" to 18".

**Truly Prefinished Appearance:** No need to mar the finish during install. FusionFrame allows for concealed fasteners for both the jamb and brickmould.

## A FULL INSTALLATION SYSTEM, WITHOUT LIMITATIONS

### TRULY PREFINISHED

**Mar-Free Install:** Removable Jamb Stop Cover allows for concealed installation fasteners – no need to mar the finish during install for a truly prefinished, flawless appearance.

**Blemish-Free Brickmould:** Removable cover eliminates the need to drive fasteners directly into the face of the brickmould.

### PERFECT AT INSTALL & BEYOND

**Structural Rigidity:** Featuring a rigid FrameSaver® core, fingerjointed to a composite bottom, with a composite exterior, FusionFrame has the strength to install like a standard wood system.

**Adjustable Brickmould:** With 1/4" of inside-to-outside "float", FusionFrame's innovative brickmould design can be adjusted to fit flush against the house, despite rough opening conditions, while keeping the door frame plumb.

**Built-in Bubble Level:** Helps get installation off to a level start.
