

IT'S NOT JUST ANOTHER SILL. IT'S A SOLUTION.

Jobsites are messy and the door sill takes the biggest hit. Whether it's denting, scratching, paint or oxidation, the aluminum sill deck gets damaged and repairs are costly or impossible to fix without replacing the sill or, in some cases, the entire door unit.

If you're paying for the costly repairs or replacement of the damaged sills, you're paying too much. Stop paying for it and start planning for it with the sill of the future, the Replaceable Deck Sill®.

HOW RDS™ WORKS: EASY AS 1-2-3.

RDS makes an accident on the job site an easy fix. Drop a brick. Spill some paint. RDS's sill deck can be removed and replaced with ease, requiring only a few simple steps.

1. DISENGAGE.

Remove sill deck with a stiff putty knife; bend front edge away from the substrate.

2. REMOVE.

Slide the deck out, away from the sill.

3. REPLACE.

Slide the new deck into place and tap into place with mallet.

RDS™ FEATURES + BENEFITS

Removable Sill Deck: Can be removed and replaced in the event that damage to the sill deck should occur.

Optional Construction Dunnage: Temporary deck and sill cap can be used during construction and replaced with final components at closing.

Enhanced Finish Flexibility: Sill deck and cap can be easily replaced should homeowner selections change – at closing or down the line.

Z-Series Modularity: RDS sill caps are interchangeable for easy modifications and retrofitting in the shop and in the field.

Available for all Single, French, Sidelite and Patio Applications: Including a 5-5/8" screen rail option.

Available for Inswing and Outswing Systems: Supporting Z-Articulating Cap (Z-AC), Z-Articulating Cap All-Aluminum (Z-AC-AA), Z-Adjustable Inswing (ZAI), Z-Adjustable Inswing All-Aluminum (ZAI-AA) and Z-Outswing Bumper Sills (ZOB).

AVAILABLE WITH TWO TIME-SAVING OPTIONS

1. REPLACEABLE ALUMINUM DECK

Replace damaged aluminum deck with a flawless new one in a matter of minutes and with tools already on hand.

2. CONSTRUCTION DUNNAGE

Prevent damage with a temporary dunnage sill cap and deck during construction. Then simply install final components.
